DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1 and 8 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by US patent No. 6, 747,996 ("Holloway et al.").

Regarding claims 1 and 8, Holloway et al. teach a method and system for providing synchronized transport across a HPNA network (A method and system for maintaining synchronization in a home network) that includes a gateway (50) with WAN interface (52) (as a host Ethernet media controller) and a HPNA interface (46b) (as a HPNA chip) (See Fig. 3, Col 2, lines 36-39),

where synchronization protocol packet (SP packet as control frame) and voice packet (data frame) pairs are transferred between the WAN interface (52) (host Ethernet media access controller MAC) and the HPNA interface (46b) (HPNA chip) (See Fig. 17, Col. 3, lines 11-13) comprising

(a) sending a SP packet (null frame) from the gateway WAN interface (host Ethernet MAC) to the HPNA interface (HPNA chip) prior to the voice packet (data frame), and

Art Unit: 2663

(b) recognizing the order wherein the SP packet (null control frame) on the HPNA interface (HPNA chip) as an indication that a next received frame will be the voice packet (data frame), thereby maintaining synchronization between the control frame and the data frame pairs (See Fig. 17, Col. 8, lines 3-7).

Allowable Subject Matter

3. Claims 2-7 and 9-14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims and if no art rejection can be applied.

4. Claims 15-25 are allowed.
